360Maps are printed on water-resistant, tear-resistant, synthetic paper. They have shaded relief allowing you to see the hills and valleys and contour lines showing you elevations and what kind of climb/descent you have to look forward to on your hike or ride. We have hiked or biked every trail on this map and used a GPS reciever and wheel odometer to verify locations and distances. These maps are a labor of love, we hope you enjoy them as much as we enjoyed making them. Thank you for your order.

Information is thought to be accurate at the time of publishing. Publisher assumes no responsibility for safety or condition of roads and trails. The representation of roads and trails outside park boundaries does not imply a public right-of-way.
